This is exactly what your engineers need!
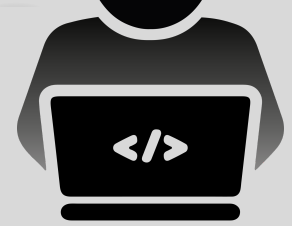

Python and C# on the road to become engineer 4.0

PROGRAMMING IN AEC

Online training for ALL Engineers

The profession of programming may not be for everyone. However, the **SKILL OF PROGRAMMING** – that's a different story! Especially in a future shaped by AI, a basic understanding of coding is often essential. Our Python and C# Fundamentals trainings are part of a holistic career development plan, which has already engaged over **600 engineers from 62 countries** across various AEC industry disciplines.

Benefits of C# and Python Training for Your Company:

- ✓ Enhanced team capabilities that save both time and money
- ✓ Employee development, guided by seasoned academic instructors
- ✓ A competitive edge through efficient use of innovative workplace tools

We provide it ALL with:

- ⊖ NO additional recruitment
- ⊖ NO inconvenient logistics (We teach online)
- ⊖ NO taking your employees away from their current projects (I require just a couple of hours of engagement per week)

Who is behind all of this?

Marcin Luczkowski

Associate Professor at NTNU and Senior structural engineer at Mulitconsult

Krzysztof Wojslaw

Parametric Design Engineer Founder of Learning Plarform LearnGrasshopper.com

Sverre Haakonsen

PHD Candidate at NTNU and Senior Structural Engineer at COWI

Don't let your Team lag behind!

Hundreds of companies have already trusted us with their teams!

Price:

547 EUR
